OPTIONS & ACCESSORIES

Lip Extensions

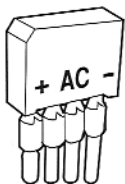

7100 Series

For centerhung doors, thick doors, or other conditions that vary from the "standard". By punching out or drilling holes in the standard lip, the lip extensions can be added in the field. Lip extensions are available in different widths.

Monitor Switches

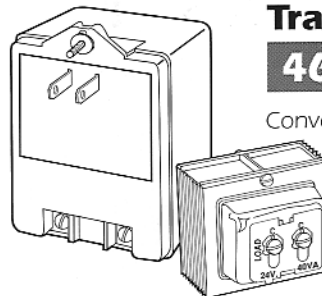

Monitoring strikes enable the operator to get a visual or audible signal of the strike's condition. Two sensor switches are added to the strike, allowing for a variety of configurations for different requirements.

Rectifier

4603

Converts low voltage AC current to DC of same voltage (e.g., 24VAC to 24 VDC).

Transformer

4605/4606

Converts 115VAC current to 24VAC.

Model 4606 plugs into a standard wall outlet.

Model 4605 can be mounted to a standard electrical junction box.
